CancerStats Report: Breast Cancer UK

Breast cancer diagnosis and treatment have improved significantly over the last 30 years, with mortality falling consistently since 1989

The Stats Info Team regularly produces comprehensive reports containing cancer statistics and information for the UK, Europe and worldwide.

We are delighted to announce the publication of our latest **CancerStats report, Breast Cancer – UK**. The report contains the latest UK incidence, mortality and survival statistics, as well as an update on the NHS breast screening programme. It also contains information on molecular biology and genetics, risk factors, symptoms and treatment.

Download the report and PowerPoint presentation, containing all charts and tables, for **free from** <http://info.cancerresearchuk.org/cancerstats>, clicking on the relevant link.

Cancer Inequalities Report

We have recently completed a joint report with the National Cancer Intelligence Network (NCIN) and Leeds Metropolitan University, describing **the excess burden of cancer in men**. The report is available to download for **free from** <http://info.cancerresearchuk.org/cancerstats/inequalities/>.

Cancer Ethnicity Report

On 25th June, we jointly launched a report with NCIN, **Cancer Incidence and Survival by Major Ethnic Group, England, 2002-2006**, at the NCIN Conference. Download the report for **free from** <http://info.cancerresearchuk.org/cancerstats/inequalities/>.

Up-To-Date

Cancer Incidence & Mortality Data

The latest UK cancer incidence and mortality statistics are currently being updated on our website. **UK Incidence for cases diagnosed in 2006**, and **mortality for deaths registered in 2007** will be available to download for **free** in the next couple of weeks.

For the most up-to-date source of cancer statistics in the UK, visit <http://info.cancerresearchuk.org/cancerstats>.

At Your Fingertips
